Guendouzi Mohamed Yaniss

Web Developer

Portfolio: [yanissgnz](#)
[github.com/YanissGnz](#)
[linkedin.com/in/guendouziyaniss](#)

Accomplished Computer Science Engineer and Frontend Developer with over 5 years of experience specializing in building high-performance, scalable web applications using React and Next.js. Proven track record ranging from co-founding ERP solutions to architecting complex frontend systems for edge computing management. Deeply driven by robust software architecture, clean code, and crafting intuitive, user-centric interfaces.

SKILLS

Frontend Ecosystem	React, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, Angular, HTML5, CSS3
Styling & UI	Tailwind CSS, shadcn/ui, Responsive Design, CSS Modules, 3D Web Animations (Three.js)
Mobile Development	React Native (Intermediate)
Backend & Databases	Node.js, FastAPI/Python, RESTful APIs Integration
DevOps & Tools	Git/GitHub, Docker, Kubernetes (K8s), CI/CD pipelines, Agile/Scrum methodologies

TECHNICAL EXPERIENCE

Frontend Developer Sep 2023 — May 2025
Namla Remote

- Architect and build the frontend architecture for the flagship Namla web application, an enterprise-grade platform managing the orchestration and deployment of edge computing applications.
- Translate complex cloud and network infrastructure data into intuitive, high-performance dashboards.
- Collaborate closely with cross-functional teams using Agile methodologies to deliver rapid, stable iterations.

Frontend Developer Nov 2023 — Jun 2024
Postlyy Remote

- Engineered and maintained the user interface for Postlyy, an all-in-one social media management tool used to create, schedule, and analyze content across X (Twitter) and LinkedIn.
- Optimized application performance, ensuring smooth rendering of heavy data analytics and multi-account publishing pipelines.

Frontend Developer Jan 2023 — Dec 2023
PivotPoint BMS Remote

- Engineered the frontend of an AI-powered Business Management Suite (ERP) tailored for SMEs.
- Built a scalable, state-managed architecture from scratch utilizing Next.js, Redux, and Tailwind CSS.
- Implemented complex data deduplication, reporting features, and modular layouts for seamless enterprise workflows.

Full-Stack Developer Jan 2022 — Dec 2022
Anti-Cancer Clinic Sidi Bel Abbes

- Designed and deployed a comprehensive internal management solution serving clinic staff and patients.
- Built multi-account access control hierarchies with specific granular privileges handled via a secure admin dashboard.
- Integrated advanced metrics and data visualization components to track staff activities and patient statistics.

Full-Stack Developer Jan 2019 — Dec 2021
Unetech Remote

- Participated in early-stage pre-project technical assessments and client requirements gathering.
- Developed highly reusable UI components, decreasing development costs and bootstrapping times for subsequent company projects.

EDUCATION

Master's Degree in Information Systems and Web Development , Higher School of Computer Science (ESI)	2020 – 2023
Engineering Degree in Computer Science , Higher School of Computer Science (ESI)	2018 – 2023
High School Diploma	Graduated 2018

PROJECTS

Bazzar: A highly responsive, multi-vendor E-commerce platform equipped with a granular admin dashboard, integrated analytics, and logistics tracking.

Tes Clone: A visually immersive web experience replicating the Tesla interface, integrated with 3D web animations using React Three Fiber.

MacOS Clone: A complex frontend project replicating the native desktop UX/UI elements of macOS inside a web browser.

Home Art: An end-to-end full-stack e-commerce solution engineered for tracking, ordering, and managing home appliance inventories.
